

CESOP reporting, done for you.

Register and file CESOP with tax authorities across the EU from one platform. No more copy-pasting data, working with clunky government portals, or waiting for slow vendors to process your files.

File across the EU. One platform for every member state.

The rule: more than 25 cross-border payments to the same payee in a quarter? That's reportable. For high-volume PSPs, that means filing with tax authorities across the EU.

CESOP is broken.

Every member state wants your data in its own portal, to its own rules. Legacy providers handle that with spreadsheets and email: send a file, wait a week, start again when the errors come back. Multiply that by every country, every quarter.

- ✗ **27 authorities**
Different languages, portals and rules.
- ✗ **Registration hell**
Powers of attorney and digital certificates, everywhere.
- ✗ **Spreadsheet ping-pong**
Email a file to your vendor. Wait a week for the errors.
- ✗ **Days of data wrangling**
Extract, process and download each country separately.
- ✗ **Too many middlemen**
Third parties between you and the tax authority slow submission.
- ✗ **Change never stops**
Schemas change, certificates expire and rules keep moving.

HOW COMPLYFIRST COMPARES

CESOP today

- ✗ Weeks of setup paperwork
- ✗ Reformat data into vendor template
- ✗ Wait a week to hear about errors
- ✗ Hand-build XML, country by country
- ✗ 27 portals and logins
- ✗ Chase every rule change

With Complyfirst

- ✓ We run your setup, end to end
- ✓ One file in, filed everywhere.
- ✓ Errors flagged in seconds
- ✓ Every file built, split and named
- ✓ One platform. API or we submit.
- ✓ Rule changes handled for you

TRUSTED BY LEADING FINANCIAL INSTITUTIONS

How CESOP works with Complyfirst

We streamline CESOP end to end, from first registration to every quarterly submission.

HOW IT WORKS

- 1 We handle setup**
We project-manage registration, powers of attorney and digital certificates in every country.
- 2 Upload what you have**
Raw exports, as they are. No templates, no copy-paste. A fresh file each quarter.
- 3 We work out what's reportable**
We apply the 25-payment rule and route every payee to the right authority.
- 4 We generate the files**
Compliant XML, split to each authority's size limits and named to their conventions.
- 5 We submit for you**
By API, so you never touch a government portal again. No API? Our team files for you and uploads the receipts.
- 6 We keep everything current**
Schemas, certificates, credentials and regulatory change, all behind the scenes.

PROCESSING SPEED

half a million

transactions per minute

Validation in near real time, not next week.

SUPPORT RESPONSES

< 1 hr responses

Real humans, on Slack or Teams

Fast answers when you need them.

EU-WIDE COVERAGE

27 

member states, one platform

Prepare and file all your EU CESOP reports in one place.

We manage it all for you.

Registrations

We manage tax authority registrations for you. We handle powers of attorney, digital certificates and credentials, and keep them current.

Submissions

We file direct, with no middlemen. Via API where it exists, or our team submits for you and uploads the receipts.

*“Using the platform felt like driving a well-designed new car:
intuitive, easy to navigate, beautifully designed. 10/10!”*

Adrian Witkowski, Head of Regulatory Reporting, SumUp
